

# HOW TO USE ODOUR KILLER

**POWERFUL ENZYME + ESSENTIAL OIL FORMULA  
ELIMINATES ODOURS AT THE SOURCE**

Safe4 Odour Killer *breaks down odour molecules* at their source – not just masking the smell.

1

## DILUTION

- General use a 1:50 dilution (1 part Odour Killer concentrate to 50 parts water).
- For larger quantities, ensure you're diluting at the 1:50 ratio as well.
- For extreme odours dilute at 1:10 until the odour is under control.

**1 PART  
ODOUR KILLER  
CONCENTRATE**

**50 PARTS  
WATER**

**GENERAL USE 1:50 | EXTREME ODOURS 1:10**

2

## APPLICATION

- Spray directly onto the surface or area where the odour is coming from.
- You can also use a mop bucket with the diluted solution.

3

## CONTACT TIME

- Once applied, let the solution sit in contact with the source of the odour.
- There is **no need to rinse** the solution off.

4

## SAFE FOR SURFACES

- Safe4 Odour Killer is non-staining, non-corrosive, and safe for a wide range of surfaces, including flooring, carpet, artificial grass, and even in gardens.

5

## NO RINSING REQUIRED

- Because it's safe for surfaces and doesn't require rinsing, it's ideal for busy environments like animal care facilities.

6

## ODOUR ELIMINATION

- The solution eliminates odours by breaking down the molecules that cause them, rather than just masking the smell.
- It's effective against various offensive odours, including urine, pet odours, anal glands and cigarette smoke.
