

Safe4

The Professional Solution

HOW TO USE SAFE4 DISINFECTANT

Safe4 Disinfectant is used by diluting the concentrate with water.

For most everyday cleaning, a 1:100 dilution (10ml of concentrate per 1 litre of water) is recommended. For higher-risk situations or confirmed outbreaks 1:50 may be necessary.

Always refer to the product label for specific instructions and contact times.

DETAILED INSTRUCTIONS

- **1. DETERMINE THE APPROPRIATE DILUTION:**
The standard dilution for everyday use is 1:100. For specific situations, such as confirmed outbreaks of canine parvovirus or for highly resistant viruses, a 1:50 dilution is recommended.
- **2. MIX THE SAFE4 SOLUTION:**
Mix the recommended amount of Safe4 concentrate with water in a clean container or sprayer. For example, for a 1:100 dilution, mix 10ml of Safe4 concentrate with 1 litre of water.
- **3. REMOVE ANY SOLIDS OR DEBRIS FROM THE AREA –**
faeces or other visible dirt, organic matter.
- **4. APPLY THE SOLUTION:**
Apply the diluted Safe4 solution to the surfaces to be disinfected. This can be done with a spray bottle, cloth, mop, or other appropriate method.
- **5. ENSURE CONTACT TIME:**
Allow the surfaces to remain wet for the recommended contact time, which can vary depending on the application. This is usually indicated on the product label or in the Safe4 literature.
- **5. AIR DRY:**
For general disinfection, not need to rinse off in animal care settings. However, for surfaces that will be in direct contact with food or medical instruments, rinsing with clean water is recommended. Allow the disinfected surfaces to air dry.
- **6. SAFETY:**
Always read and follow the instructions on the product label. Wear appropriate personal protective equipment, such as gloves, when handling Safe4 concentrated disinfectant.

DILUTION RATES

EVERYDAY USE – 1:100 DILUTION 10ML CONCENTRATE PER 1 LITRE OF WATER

	CONCENTRATE	WORKING SOLUTION
	10 ml	1 Litre
	50 ml	5 Litres
	100 ml	10 Litres
	200 ml	20 Litres
	250 ml	25 Litres

HIGH RISK / OUTBREAKS – 1:50 DILUTION 20ML CONCENTRATE PER 1 LITRE OF WATER

	CONCENTRATE	WORKING SOLUTION
	20 ml	1 Litre
	100 ml	5 Litres
	200 ml	10 Litres
	400 ml	20 Litres
	500 ml	25 Litres

Always refer to the product label for specific applications and required contact times.

IMPORTANT CONSIDERATIONS

-  **Pre-cleaning:** Before applying Safe4, remove any visible dirt, debris, or organic matter with soap and/or water.
-  **Specific applications:** For specific applications, such as bedding, tools, or bowls, refer to the Safe4 literature for the recommended dilution and instructions.
-  **High-risk areas:** Pay special attention to areas like kennels, exam tables, and food/water bowls, which may require more frequent and thorough disinfection.
-  **Contact time:** Ensure the recommended contact time is maintained for effective disinfection.
-  **Storage:** Store Safe4 concentrate out of sunlight under 30 degrees and out of reach of children.

For more detailed instructions and specific applications, consult the Safe4 Disinfectant website or the product literature provided with the Safe4 product.
